

**Stevens-Johnson syndrome and toxic epidermal necrolysis: efficacy of intravenous immunoglobulin and a review of treatment options**

Teo L, Tay YK, Liu TT, Kwok C

*Singapore Med J 2009; 50(1): 29-33*

On page 33, left column, last paragraph, lines 4–5 should read “We recommend a total dose of 3 g/kg of IVIG based on our experience...”
